

AEGIS EMPIRE

Player Manual v1.0

What is AEGIS Empire?

AEGIS Empire is a browser-based business simulation game where you start with **100,000 in personal capital** and build a global corporate empire. Trade stocks and crypto on the Exchange, acquire businesses across the 3D world map, run R&D projects, manage your board of directors, recruit employees through card packs, and even dabble in shadow operations. Every decision shapes your four core axes: Growth, Governance, Impact, and Power.

Getting Started

1. Open your browser and go to:

<https://aegis-empire.netlify.app>

2. Click "**Create Account**" and enter your email, password, and commander name.

3. On first launch, **pick your country** so tax wrappers, retirement accounts, and regulatory figures match your domicile. You can change it anytime in Settings.

4. You begin with **100,000 personal balance** and a clean slate - no company funds, no owned businesses, no employees.

5. Your progress **saves automatically** to the cloud every few seconds. Log in from any device to continue.

Core Tabs

- **Overview** — Dashboard showing your empire stats, balances, axes, and key performance metrics at a glance.
- **Globe** — Interactive 3D world map. Browse and purchase nodes (businesses) across 13 industry sectors. Upgrade them 1-5 for more income.
- **Learn** — ECFL Academy with structured courses, lessons, and exams. Boost your Financial Literacy of Understanding (FLOU) level.
- **Exchange** — Buy and sell stocks, crypto, forex, bonds, and other financial instruments with real-time price ticks.
- **Lab** — Launch R&D projects and experimental investments. Discover new technologies and revenue streams.
- **Social** — BizTok social feed with NPC profiles, posts, clips, and daily challenges. Build reputation and followers.
- **Battle Pass** — 50-tier seasonal progression with free and premium tracks. Earn XP from matches, trades, and daily activities.
- **MarketWire** — Yahoo Finance-style news, screener, portfolio tracker, and agent-written journalism on your holdings.

Key Mechanics

- **Nodes** — Businesses on the globe you can purchase, build, and upgrade (levels 1-5). Each generates monthly income based on its sector and level.
- **Board of Directors** — Four board members set quarterly goals. Meet their targets to keep satisfaction high. Drop below 25% and you get sacked (game over for that career).
- **Heat (0-100)** — Criminal and shadow activities raise your Heat. Above 60: income penalty. Above 80: assets frozen. Heat decays slowly over time.
- **Agent Cards & Q-Coins** — Open packs (Q-Coins or cash) to mint AI agent cards from Common to Mythic. Assign them to nodes, office rooms, or PvP squads for performance bonuses.
- **Corporate Structure** — Start as a Sole Trader. Restructure to Partnership, LLC, Public Company, Social Enterprise, or NGO. Each has different tax rates and perks.
- **Jurisdiction** — Your country drives the tax wrappers, retirement accounts, and regulators you see in Learn and Exchange. Pick it on first launch, change it anytime in Settings.
- **Game Tick** — The economy updates every 30 seconds: income arrives, expenses deduct, board patience shifts, and heat decays.
- **Shadow Ops** — High-risk covert operations (cyber, financial, physical). Big rewards but raises heat significantly.

Controls

Action	Desktop	Mobile
Navigate tabs	Top nav bar	Bottom nav bar
Command Terminal	Cmd+K / Ctrl+K	Tap CMD button
Dev Panel (beta / admin only)	F2	Tap DEV button
Change jurisdiction	Settings > Country	Settings > Country
Sign Out	Click EXIT	Click EXIT
Retract nav	Click RETRACT handle	Tap RETRACT handle

Player Notes

- If the game gets stuck or shows stale data, clear localStorage: **DevTools** → **Application** → **Storage** → **Clear site data**.
- Your save is synced to Supabase automatically; logging in on another device restores your progress.
- Localized content (UK ISAs, US IRAs, FR PEA, DE Riester, etc.) appears only for countries we've mapped - pick a supported country for the richest experience.
- The **Dev Panel** (F2) is gated to admins and approved beta testers.
- Works on desktop and mobile browsers. Chrome, Safari, Firefox, and Edge are all supported.
- Found a bug or have feedback? Open an issue at the game's support page - screenshots and reproduction steps are gold.
